0008 vtx g2v

4. Pairing a Printer
    If you do not have a printer paired, tap the bottom of the dashboard
    Scan the Printer QR code to pair the printer

3. Browsing Models
    The "Explore" section has public models
    The "MyONO" section has models you have uploaded yourself or saved from the "Explore"
    section (instructions on uploading models are on the next page)

4. Slicing Model
    Tap "3D Print" on the model details screen
    Scan the Resin QR Code to the right
    Tap "Next"
    Modify the model dimensions by tapping the arrows on the bottom left
    To reset the original scaling, set scale as "1:1"
    Add or remove model copies by tapping the +/- buttons on the bottom right
    Tap the center right slicing button to slice the model

5. Prepare for Printing
    Tap "Proceed to Print"
    Plug headphones into your phone's headphone jack
    Tap "Next"
    Complete the checklist
        Round checkboxes will be checked automatically as they are completed
        Square check boxes must be checked manually

Uploading a Model Via the Web App

1. Go to https://web.ono3d.net

2. Log in to your account
    If you have an account, tap "Sign In" and enter your user name and password
    If you do not have an account, tap "Sign Up" and enter the required information

3. Click "Upload Model"
    The button can be found on the Dashboard, top right of the header, and main menu

4. You can choose your file in two ways:
    Drag and drop a file to the upload box
    Click the upload box and browse for the file

5. Type in a title and description

6. If you wish to make the model viewable to all ONO users, click the switch to make the model public.

7. Click the "Upload" button and your model will appear in your "MyONO" once it's done uploading!
